

ADVANCED PLC

TRAINING
COURSES

by InterConnecting Automation Inc.

ICA

Advanced PLC Training

Course Description

Experience the newest and greatest technology and products in this high-tech Advanced PLC Seminar

Just a few of the topics we cover in this class:

- Designing and implementing control systems
- Networking wired and wireless
- Creating structured programs
- V-memory
- Special bits
- Tables and pointer commands
- Programming a working model of a robotic welder line

*3 days of hands-on training
taught exclusively by Doug Bell*

“Doug Bell will dazzle you with his expertise. He will challenge even the most experienced engineer. Doug has trained thousands in basic PLC knowledge. He will now go on to use “Star Wars-like” technology to provide you with the most in your training experience. Only Doug can offer this training with the energy and knowledge he holds.”

ONLY
\$895
PER PERSON

Fee includes:

- AutomationDirect PLC User Manual
- Training manuals

In order to assure registration, all class fees must be received prior to the scheduled class date.

Hotel rooms are available at a discounted rate, however, reservations must be made two weeks prior to date of class.

Course Syllabus

PLC Programming

- Debug and fix programs that do not work
- Create programs based on specifications given to you in class
- Learn table and pointer commands and their use
- Learn the functions and program C-more panels
- Learn how to reduce multiple rungs of ladder logic into one
- Wire and use Terminator and DL205 Ethernet remote I/O
- Stage programming — RLL Plus
- Scaling multiple analog inputs using one rung
- Use and apply knowledge learned in the Basic PLC Seminar
- Finish the class by programming a real working model of a robotic welder line over the Ethernet network

Networking Focus

- Serial RS232 and RS422
- Ethernet — wired, wireless, fiber optic, MAC, IP, PLC addressing
- Networking with multiple PLCs and PLC master/slave
- Control motor speed from a master PLC to a slave with motor/encoder setup
- Read motor speed (*from encoder mounted on motor*) to high speed counter inputs and display on a remote PLC
- Display your motor speed on other trainers throughout the room
- Learn to use Read and Write commands and the wiring of a network
- Use photoeyes, proximity switches and encoders

2021 Schedule

August 10-12, 2021
Sept 21-23, 2021

Atlanta GA
Dallas TX

About the Instructor: Doug Bell

Planned and coordinated automation of a Milwaukee manufacturing facility.

Designed from scratch the automation portion of a new automated can plant using AutomationDirect products exclusively.

Designed electronic control systems for more than 45 facilities worldwide using multiple vendor PLC products.

Developed and implemented a variety of cost and labor-saving equipment.

20 years experience with industrial electronics, including 17 years of PLCs.

Wide variety of applications experience, including electronic feeder controls, HVAC controls, automated test stations, coating lines, printing lines, coordinated drive systems, motion systems, high-speed applications, communication systems, PC-based control solutions and HMI systems.

Course Fee:
\$895.00 per person
